Additional Wavetek Test Tools for Electrical Professionals

10XL

Basic function, low cost, 2000-count DMM with unique Safety Tester™ feature. Safety Tester displays presence of live AC or DC voltage on series of LEDs that will operate regardless of battery condition. Measures AC and DC volts, DC current, resistance, continuity check and diode test.

23XT

This higher featured DMM is designed for the HVAC/R electrical specialist. The meter has volt, amp functions with temperature measuring to 1400°F/750°, resistance, logic test, and our unique Safety Tester feature. The 23XT's Safety Tester displays presence of live AC voltage on a series of LEDs, and is functional regardless of battery condition.

DM73A

DM73A, 4200-count DMM in a unique, small Pen-Style package is a preferred tool for lighting specialists. This DMM is ideal for tight measuring spots such as wiring closets and marshaling panels. Unit measures AC and DC volts, resistance, continuity, and has the Probe Hold™ feature. Optional alligator clip test lead optimizes "one-hand" operation.

HD Series

Rugged and reliable, the HD110B and HD115B DMMs are designed to withstand the most demanding elements and environments. These true HD meters are enclosed in Valox™ plastic enclosures, and have shrouded safety test leads and shock-mounted LCD displays that perform under any condition. The HD115B has the world's brightest and most evenly distributed backlight for added convenience. Drop-proof, dirt-proof, water-proof and oil-proof, the HD Series DMMs are built to be indestructible.

Wavetek's New Clamp-On Series

Compact and Convenient Clamp-On Meters for all your Electrical Testing Needs

There's no question the clamp-on style meter continues to be the preferred meter of choice for testing, measuring and troubleshooting typical electrical installations. Leave it to Wavetek to improve upon the already compact, convenient style of the clamp-on meter with the new Mini-Clamp Series – four meters even smaller in size complete with a more rounded and ergonomic shape that's easier to grip. Adding to the comprehensive family of robust clamp-on meters, the Mini-Clamp Series consists of two ammeters – the AD20 and AD40 – and two digital multimeters – the AC20 and AC40. Each meter is specifically tailored to provide reliable, non-invasive testing for various current, voltage and resistance ranges and includes Tech-Preferred™ features such as Data Hold and Auto Power Off. Look for the distinctive blue and yellow color scheme of Wavetek's clamp-on meters – the only choice for electrical professionals who demand value, durability and high quality from their test tools.

Tech-Preferred™ Features

All Wavetek clamp-on meters are distinguished with many time-saving, Tech-Preferred advantages that give you increased utility and greater performance in every application.

- Data Hold
- Auto Power Off
- Autoranging

"No Hassle" Warranty Program

A leading manufacturer of test and measurement equipment since 1964, our commitment to reliability and high quality is backed by the industry's only "No Hassle" Warranty Program. Should any Wavetek clamp-on meter require warranty service, your local dealer is authorized to replace it on the spot. No waiting, no freight charge, no hassle! This dedication to service excellence is supported by a worldwide network of Wavetek dealers and distributors.

CT Series Current Clamps

A comprehensive line of transformers/probes for AC or AC/DC current measuring adds to the list of Wavetek products for electrical measurement applications. Use these "CTs" as an accessory front-end to standard DMMs, recorders, digital or analog meters, data loggers/DAS, O'Scopes, or other test and measurement instruments to increase current measuring capability. These probes convert high current to a low level millivolt or milliamp signal for input directly to test instruments.
